Dear Sir,

I have been a fan of **Digitise** for months, so I was thrilled to see an opening on the team for a UI/UX Designer. I think my experience in design systems, user research, app design and UI design also have knowledge of HTML and CSS as well would make me a great addition to your team.

For the past three years, I have worked as a UI/UX Designer, creating seamless web and mobile applications for various clients. At the AHDUS, I am responsible for the development and implementation of several new user-facing products. I worked cross-functionally with product and development teams to integrate a new customer support portal, leading to a 65% increase in customer satisfaction. I am eager to apply my expertise to help build the next version of the **Deine Grunwelt** app.

I admire **Digitise's** commitment to empowering communities. As someone who volunteers regularly in my community, I believe I would be a great fit for **Digitise**.
I am excited to help enhance **Digitise's** already great work. I have attached my resume and portfolio. Please feel free to contact me at **+923058931724** or **taimoorkhan281097@gmail.com**. Thank you kindly for your time and consideration. I hope to hear from you soon.

Thank you,

Muhammad Taimoor Khan.
